

GULFSTREAM G500 

FLEXJET 

BEAUTY AND POWER
TAKE YOU FURTHER THAN EVER. 

UNDENIABLY UNRIVALED

Gulfstream's unquestioned heritage of excellence continues with the new Gulfstream G500. As the preeminent business jet manufacturer, Gulfstream has once again raised the bar. The successor of the G450, the G500 boasts optimized design and performance that is built on six decades of experience manufacturing jets for business travel. Each improvement in design and performance elevates not only the aircraft, but also your travel experience.

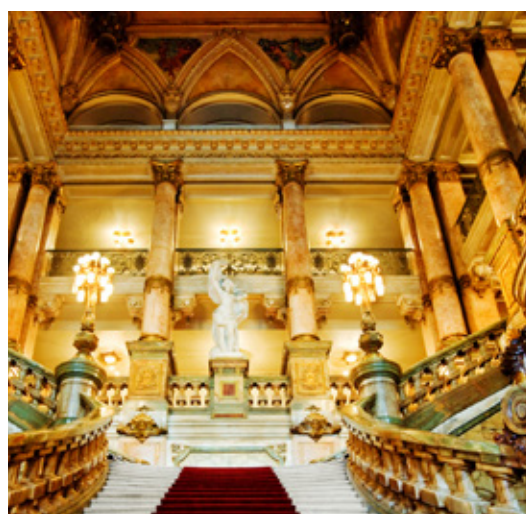

The G500 makes a statement wherever you land. And Flexjet is honored to be the exclusive North American launch partner of the latest aircraft from this legendary manufacturer.

EXCELLENCE: EVOLVED. INTRODUCING THE UNMATCHED G500.

THIS FEELING.
NOW AVAILABLE IN AN AIRCRAFT. ✈️

BRING THE WORLD CLOSER

The Gulfstream G500 is built for distance. International borders become immaterial when you're flying with Pratt & Whitney Canada engines at Mach 0.85. With a range of 5,000 nautical miles, the G500 can connect far-flung cities in a single flight. Whether you're flying from Los Angeles to London, New York to Paris or Istanbul to Cape Town, low-altitude cabin pressure and clean, replenished air will ensure you arrive refreshed and ready for whatever your destination has in store.

Meanwhile, your experience in the cabin will guarantee that whatever your flight time, it will pass quickly, comfortably and productively. With an ample wide-cabin design that allows for up to 13 passengers to relax or work comfortably, the cabin is outfitted with the high-speed connectivity that business demands, and streaming in-flight entertainment requires.

Gulfstream has always led the industry in developing innovative safety technology, and that tradition continues in the G500. The jet comes equipped with the Enhanced Vision System (EVS) that heightens the pilots' awareness in low-visibility conditions. Gulfstream is the first manufacturer to offer this latest generation of EVS, and it's standard on all G500 aircraft.

WE DON'T PURSUE PERFECTION, WE REINVENT IT. ✈️

EVERY LAST DETAIL DESIGNED FOR COMFORT

Aboard the G500, you'll see and feel years of research and countless hours spent by aviation's top designers and engineers coalesce into a tremendous first impression. Ergonomic seats support your natural posture; controls are arranged intuitively. When you sit down aboard a Flexjet G500, you'll have a sense of familiarity that will make you feel right at home at 50,000 feet.

The performance of the G500 is not limited to the jet itself. At Flexjet, we understand that your trip begins before takeoff and ends long after you land. So, to enhance your experience, Flexjet offers Red Label, an exclusive level of service. This ensures there is just one flight crew dedicated to your G500, who together have an intimate understanding of the aircraft and the needs of its regular passengers. Red Label jets are also part of the LXi Cabin Collection, a line of custom aircraft interiors that take luxury to a new level.

We invite you to explore the custom interiors of our G500 collection, and indulge your penchant for the impeccable.

AN UNRIVALED COMBINATION 
OF SUBSTANCE AND STYLE.

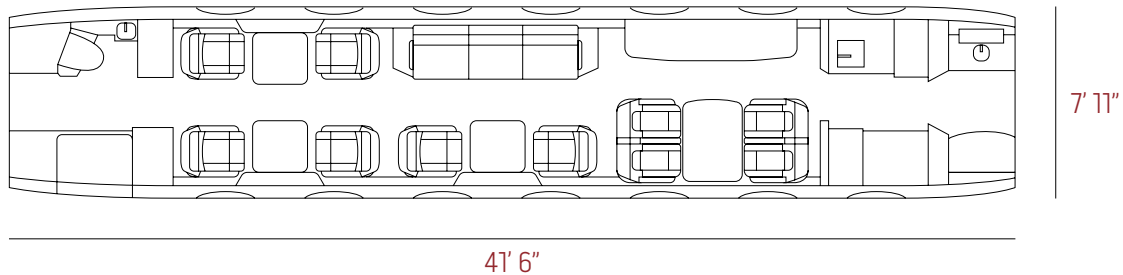

LIVE IN THE MOMENT

Gulfstream has been a long-time favorite among elite private travelers, and when you fly aboard the Flexjet G500 you'll understand why. The optimal size and shape for best-in-class speed and maneuverability, the cabin strikes a perfect balance between spaciousness and performance. Divided into three sections, the aircraft cabin allows for separation between work and leisure, or dining and rest. Jet beds, a wide divan and berthable seating ensure a comfortable, relaxing environment, even on 10-hour flights.

The iconic panoramic windows pull your gaze to the clouds below while filling the cabin with natural light. Anchored, pedestal-mounted conference tables provide maximum stability for uninterrupted productivity, and cabin noise is all but eliminated thanks to advanced acoustical engineering.

Throughout the aircraft you'll find state-of-the-art materials, artisanal details, and sophisticated service that anticipates and accommodates your every need. Whether you're traveling for business or pleasure, with associates or with family, your experience aboard the G500 is precisely what you require it to be—flawlessly comfortable, luxuriously practical.

AN EXCLUSIVE AIRCRAFT. AN ELITE PARTNERSHIP. UNMATCHED SERVICE.

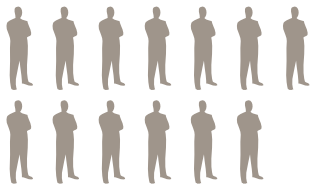

Through an exclusive arrangement with Gulfstream, Flexjet is the fractional launch partner of new G500s in North America. We're thrilled for the opportunity to continue to work closely with Gulfstream, an organization that provides G500 owners access to a comprehensive aircraft service and support network. The award-winning Gulfstream Product Support program is built on a team of service professionals available 24 hours a day, 365 days a year, and dedicated jets that will bring engineers and parts to wherever they are needed. With the G500, you can travel to distant continents with absolute peace of mind.

In addition to a purchasing a fractional share of the G500, you can also access our large-cabin aircraft fleet, including the G500, through the Flexjet Global Access program. This program was created specifically for those who need to rely on a large-cabin option less frequently, offering owners special stage-length pricing based on the duration of their trip.

When you land in a G500, you're sending a message to the world that you've arrived. It's a message that transcends language, and proof that the most powerful statements are the ones you make without saying a word.

PASSENGER CAPACITY

13 Passengers

BAGGAGE CAPACITY

175 ft³ (cubic feet)

SPEED & RANGE
